

# Dienstag - schedule your team

## PRESS INFORMATION

### **„Dienstag - schedule your team“: Who, with whom and when?**

### **Create team schedules quickly, easily and flexibly with the iPad**

**May 05, 2015:** Whether in foodservice, the healthcare sector, gas stations, the tourism sector or many other businesses: Creating team or shift schedules is often highly complex and time-consuming. Who can work in the early, the late, the night shift? Who's on vacation right now? Who's sick? The personnel manager or shift scheduler needs to consider all this and insert it in the team schedule - mostly handwritten. If employees want to change shifts or someone can't come to work last-minute, things get even more complex and annoying. Sometimes it takes a huge amount of time and effort to coordinate and organize, to avoid misscheduling and inefficient workflows.

### **Efficient shift scheduling and direct employee information**

Partners Codeon GmbH and digitise, both agencies based in Germany developed the iPad App „Dienstag - schedule your team“.

Dienstag App is a user-friendly shift scheduling app for the iPad that can be used in a wide range of businesses and work sectors. With „Dienstag - schedule your team“, it's easy to schedule shifts and create readable work schedules for your employees in just a few steps. The schedule can be sent to/ shared with the entire team. Each team member immediately has the latest work times and all the information they need right at their smartphone, tablet or computer. Even absences like vacation or illness can be easily managed and evaluated with „Dienstag - schedule your team“.

### **Logging schedules on paper was yesterday.**

### **„Dienstag – schedule your team“ is today!**

André Eislebe, CEO of digitise – ideas in motion and the person in charge of marketing, explains: “Dienstag - schedule your team“ is extremely flexible and can be used everywhere. It's ideally suited to managing up to 20 employees and is fairly priced. Once purchased, the app can be used indefinitely – without a monthly subscription or any contract commitment.” Dennis Unverricht, in charge of app development at digitise, adds: „The big advantage of „Dienstag - schedule your team“ is its easy and intuitive operation. Work days can be scheduled efficiently in a digital interface, without complex coordination or tedious paper schedules. It perfectly fits to smaller businesses using shift or task work.”

### **„Dienstag - schedule your team“ will be released world wide in the AppStore starting May 05, 2015.**
